

Twenty-First International Conference on Grey Literature *Open Science Encompasses New Forms of Grey Literature*

German National Library of Science and Technology

Hannover, Germany • October 22-23, 2019

Conference Announcement

For more than a quarter century, grey literature communities have explored ways to open science to other methods of reviewing, publishing, and making valuable information resources publicly accessible. This Twenty-First International Conference on Grey Literature seeks to demonstrate how the principles of science and advancements in information technology have impacted the field of grey literature and in turn how grey literature by implementing these has contributed to the open science movement.

Open science is defined as the movement to make scientific research, data and dissemination accessible to all levels of an inquiring society¹. Grey literature by definition seeks to make publications produced on all levels of government, academics, and business openly accessible different from those controlled by commercial publishing. As such the open science movement incorporates the work carried out by grey literature communities and renders an even broader framework encompassing newer forms of grey in both textual and non-textual formats.

Open science encompasses the life and physical sciences as well the social sciences and humanities as does grey literature. Open science recognizes the value of grey literature in the process of knowledge generation and as such acknowledges contributions made by researchers, authors, and their communities of practice. Open science changes the way research is done and allows for convergence with the field of grey literature. It is within the open science movement that grey literature and its wealth of information resources are valued and properly exploited for society as a whole.

Conference Topics

- Research Sharing relies on Open Data
- Open Source Software benefits Grey Literature
- Publishing Grey Literature opens up the Review Process
- Confronting Obstacles and Challenges to Open Access
- Open Resources for Education in Library and Information Science
- Open Science Principles promote the field of Grey Literature

Dateline 2019

• March 31	• April 12	• April 18	• April 25	• Sep. 15	• Sep. 20	• Oct. 15	• Oct. 22-23
Close, Call for Papers	Program Committee Meeting	Authors Notified	Open, Call for Posters	Close, Early Conference Registration	Close, Call for Posters	Submission Conference Papers	GL21 Conference Hannover
