GL12 Keynote Speaker

Twelfth International Conference on Grey Literature
NTK Prague, Czech Republic, 6-7 December 2010

Blane K. Dessy, Executive Director FLICC-FEDLINK, Library of Congress

Blane Dessy will be addressing recent developments in the grey literature field within North America. Of note, will be his discussion of U.S. efforts to promote interest in and the utilization of grey literature produced in the United States and to advance discussion, research and communication in this field of information. He will also be outlining how public and private organizations can cooperate and collaborate on the development and distribution of networked sources worldwide. Among U.S. federal libraries efforts, Mr. Dessy will announce the formation of FedGrey, the federal library

community's new working group on grey literature. This group will work with federal libraries to promote federal library and information center interest, expertise and utilization of grey literature and to advance its discussion, research and access. Mr. Dessy will also share his thoughts on current trends regarding best practices, applications, definitions, standards and model programs in e-Science, library and information science education, and intelligence analysis underway in the United States.

GreyNet welcomes CVTI-SR as a new Institutional Member

GreyNet International

GreyNet's future is counting on You

Grey Literature Network Service

Online Survey 2010

Dear Colleagues,

The future of GreyNet is counting on the response by the international grey literature community to a couple of relevant questions. TextRelease, which powers the Grey Literature Network Service since its relaunch in 2003, is currently drafting a Business Report 2010-2011. An initial draft has already been circulated to GreyNet Associate Members and their comments and recommendations will be incorporated in a final draft that will be presented during the Twelfth International Conference on Grey Literature this December in Prague. A couple of core questions, however, require the response by the international grey literature community, and for this reason an online survey is being conducted. It will take only two minutes of your time, but it will make all the difference.

What type of infrastructure would best serve the international grey literature community? (1.) Sole Proprietorship, (2.) Foundation, (3.) International Association, (4.) Subsidiary Company, (5.) Other:

What type of infrastructure is most likely feasible for GreyNet International? (1.) Sole Proprietorship, (2.) Foundation, (3.) International Association, (4.) Subsidiary Company, (5.) Other:

Further comments:

Your name and affiliation:

To complete the online survey,

GreyNet Conference Preprints Current, Comprehensive, and Now Available via the OpenSIGLE Repository

The most current and comprehensive knowledge base in the field of grey literature is now openly accessible to researchers, students of library and information science, as well as communities of information practitioners and professionals across science and technology. Sincere thanks to the hundreds of authors and researchers worldwide, who have contributed over the past 15 years to the International Conference Series on Grey Literature. You are the pioneers in this expanding field of information studies, and your years of work are now openly accessible today and everyday.

Research on Grey Literature in Europe

The Grey Journal, Volume 6, Number 3, Autumn 2010

Petra Pejřov, Guest Editor

As guest editor for this issue entitled "Research on Grey Literature in Europe", I have brought together six articles from authors and researchers in the Czech Republic and Italy. While Italy is well known for its contributions to this field of information dating back even before the First International Conference on Grey Literature in 1993, the Czech Republic has only recently focused on research in this field. To a great extent, this has been motivated by a project organized and managed by the National Technical Library in Prague. The project is discussed in the opening article of this journal. Even more recently, we find that Czech research on grey literature has become aware of the advantages of collaborating with other researchers in Europe and abroad. During the Twelfth International Conference on Grey Literature in Prague, the results of one such study carried out with a Canadian researcher will be presented. The study deals with document typology, and the analysis is based on the classification of a number of systems including GreyNet, OpenSIGLE, Czech ASEP, RIV, et cetera.

In analyzing lists of document types, it was discovered that these typologies contain other aspects, besides "real" document types (reports, theses, etc.). Take for example events (arrangement, organization), types of events (conferences, speeches), producers (universities, institutes), processes (translations, output), content (political documents, legal texts), location (domestic, foreign), and format (e-texts, numeric data). However, since this approach is not systematic, it was decided to create a classification scheme for document types only, and then classify the other aspects into various groups in order to define them more precisely. The scheme will appear in text version and will schematically incorporate the use of mind maps.

It is believed that identifying a specific typology for credible grey literature document types, particularly reports, conference proceedings, and government documents, will assist in the classification of grey literature in the fields of science, research, and education. On the other hand, grey literature also consists of various means of communication, such as telephone calls, meetings, e-mails, blogs, interviews, social networking tools, and discussions in Wiki. And, these now present an added challenge for the grey literature community. <http://www.greynet.org/thegreyjournal/currentissue.html>

Multimedia and Visualization Innovations for Science

ICSTI Workshop hosted by Microsoft
Research on February 8, 2011

Multimedia and visualization tools and technology offer tremendous opportunity for accelerating scientific discovery. Where science was once limited to text and two-dimensional graphs and charts for communications purposes, multiple factors have contributed to a rise in the use and availability of multimedia and visualization as tools to augment and enhance more rapid uptake of science. This workshop will feature leading-edge innovations in science-oriented web multimedia, large-scale data exploration and visualization, speech and object recognition, image indexing and analysis, human/computer interaction and virtual environments, among other topics. Presentations will be made by technology, science, and information professionals across the broad spectrum of academia, government, business, and industry.

National Technical Library (hereafter referred to as "NTL") is central professional library open to public, which offers unique collection of 250 thousand publications freely accessible in open circulation. Its holdings form the largest collection of Czech and foreign documents from technology and applied natural sciences as well as associated social sciences. It contains total of 1.2 Mil. volumes of books, journals and newspapers, theses, reports, standards, and trade literature in both printed and electronic forms. Besides its own collection, parts of Central Library of CTU in Prague and Central Library of ICT holdings are accessible in NTL.

Held in the National Technical Library in Prague, Czech Republic, on December 6 – 7, 2010.

As corresponds to its statutes the NTL runs – among others – the project of building the **National Repository of Grey Literature**. The project aims at gathering metadata and possibly full texts of grey documents in the field of education, science and research. The NTL supports an education in the field of grey literature through annual seminars in the Czech Republic.

Library, Information Science & Technology Abstracts™ with Full Text
Available via EBSCOhost®

The definitive professional information resource designed for librarians and information specialists...

Library, Information Science & Technology Abstracts™ with Full Text is an indispensable tool for librarians looking to stay current in this rapidly evolving field.

Comprehensive content includes:

- Full text for more than 270 journals and nearly 20 monographs
- Indexing for more than 550 core journals, 50 priority journals and nearly 125 selective journals
- Includes books, research reports, proceedings and author profiles
- Access to 6,800 terms from reference thesauri
- Coverage extends back as far as the mid-1960s

Subject coverage includes:

- Bibliometrics
- Cataloging
- Classification
- Information Management
- Librarianship
- Online Information Retrieval
- And much more...

Contact EBSCO Publishing to learn more about *Library, Information Science & Technology Abstracts™ with Full Text*, or to request a free trial.

About GreyNet Newsletter

This serial publication endeavors to keep information professionals abreast of developments in the field of grey literature. The bimonthly newsletter gives exposure to GreyNet's information resources and frontline activities with special emphasis on the International Conference Series on Grey Literature. The GreyNet Newsletter is licensed by EBSCO Publishing and can be accessed via the Library, Information Science & Technology Abstracts (LISTA) full-text database. This serial publication is made possible through the support of GreyNet's Associate Members and Corporate Authors: The British Library (United Kingdom), FLICC-FEDLINK of the Library of Congress (United States), INIST-CNRS (France), New York Academy of Medicine (United States), and the National Technical Library (Czech Republic).

Grey Literature "information produced and distributed on all levels of government, academics, business and industry in electronic and print formats not controlled by commercial publishing *i.e.* where publishing is not the primary activity of the producing body." (Luxembourg, 1997; New York, 2004)
